

Mohamed Noufal

Team Lead Wireless Networks

MORO Hub

CWNE #498

What is your level of industry experience?

With over 10 years of experience in the Wi-Fi industry, I have held key roles across the entire product lifecycle—from pre-sales and professional services to post-sales support and project delivery. My expertise spans wireless design, implementation, and deployment, beginning with outdoor P-To-P solutions and evolving into complex enterprise indoor Wi-Fi environments. This broad exposure has equipped me with a comprehensive understanding of wireless technologies and the ability to deliver high-performance solutions tailored to diverse operational needs

What are some highlights from your resume? (2-3 past positions, awards, innovations, etc.)

MORO | A DIGITAL DEWA COMPANY, Dubai
As a Team Leader IT Wireless Networks
Dubai Electricity and Water Authority
As a Senior Network Engineer

Certified Wireless
Network Professionals

When did you first become interested in wireless?

I got into wireless over ten years ago, starting with outdoor point-to-point setups. The complexity and creativity of working with invisible signals drew me in—and it's been my passion ever since

What certifications do you currently hold?

Cisco Certifications: ENCORE, ENWLSI, ENSLD

Ekahau Wireless: ECSE Design D-537 | ECSE Troubleshooting T-372

Huawei Certifications:

Wireless Technology HCIA-WLAN | HCIP-WLAN CEWA

Advanced Routing & Switching HCIA | HCIP-DATACOM

Where did you receive your training/education?

I received my formal education in Egypt, and since have attained industry certifications in the UAE.

I got my trainings from several sources, like on-class, e-Learning, e-books and blogs.

Why did you choose the CWNE path?

I chose the CWNE path because I wanted to push beyond just knowing how Wi-Fi works—I wanted to master it. CWNE isn't just a certification, it's a commitment to deep expertise, real-world problem solving, and continuous growth. It aligned perfectly with my passion for wireless and my drive to lead in this field

How long have you been involved in the CWNP certification process?

I have been involved in the CWNP certification process back in 2019 and got my first CWNP certification in March 2019.

What do you hope to accomplish?

I aim to keep growing as a wireless expert—sharing knowledge, solving complex problems, and helping shape better, more reliable networks. Whether it's mentoring others or leading innovative projects, I want my work to make a lasting impact in the industry.

Why did you choose CWNP and its certifications over other industry designations?

CWNP focuses on real wireless knowledge, not just vendor tools. I chose it to build deep, practical skills that apply across any platform.

What value will your CWNE provide to you, your clients, and/or your company?

CWNE validates my ability to design, deploy, and troubleshoot complex wireless networks with confidence. For clients and my company, it means trusted expertise, fewer issues, and smarter solutions—delivered faster and with precision. It's not just a title; it's proof of deep, real-world capability.

What aspects to becoming certified do you feel are most important?

Certification builds trust—with clients, employers, and peers. It shows you're serious, skilled, and committed to doing things the right way.

What was the hardest part of the whole process and how did you overcome it?

The hardest part was writing the CWNE essays. Turning years of hands-on experience into clear, structured stories took time and reflection. I overcame it by breaking each essay into smaller parts, focusing on real challenges I'd solved, and staying consistent with my writing schedule. It taught me as much about communication as it did about wireless.

What would you say to anyone considering a CWNE designation?

If you're serious about mastering wireless, go for CWNE. It's not just a certification—it's a journey that proves your depth, experience, and commitment to excellence. It challenges you, but the reward is unmatched credibility and respect in the industry

To whom would you recommend the CWNE program?

I'd recommend CWNE to wireless professionals who want to prove their expertise and grow in the industry. It's for those ready to go beyond basics and commit to mastering Wi-Fi
