

Cedric Terrier

Owner and WiFi Expert

WattlsWiFi

CWNE # 235

What is your level of industry experience?

10 years and 3 years as a WiFi expert.

What are some highlights from your resume?

2005-2011 Project Manager and Wireless Administrator in Hospital and University Center of Bordeaux, France

2012-2014 Director of wireless and security expertise center at Kinessor Montreal, Canada

2015-2017 Owner and Wi-Fi expert at WattlsWiFi

Where did you receive your training/education?

BBRS Consulting, WLPC_EU and self training.

Why did you choose the CWNE path?

I really like learning trainings close from standard (IEEE) and not too close from constructor dialectic.

What do you hope to accomplish?

I hope to be a good trainer on wi-fi and educate a new generation on that great technology.

Why did you choose CWNP and its certifications over other industry designations?

I really liked my first book, CWNA-100 From Coleman and Westcott.

What value will your CWNE provide to you, your clients, and/or your company?

The certification is not very well known in France, but I do my best educate my clients on it. My clients like to learn more on that technology, so CWNE gave me a level of knowledge to help them, and I think in the future it will be a good brand for my company.

What would you say to anyone considering a CWNE designation?

Do it, don't hesitate or be discouraged by the requirements. It is a great honor to have the designation bestowed upon you and it's one of the few designations that have a real rigorous program that is very satisfying at the end.
