Nicolò Venchierutti Earns a CWNE® — One of the Most Respected Designations in the IT Industry Today.

*Venchierutti is the 151st Wireless Professional to Join the Certified Wireless Network Experts Ranks,
the Prestigious Last Step in the CWNP Program*

DURHAM, N.C., December 10, 2014 – [CWNP, LLC \(Certified Wireless Network Professional\)](#), has announced Nicolò Venchierutti as the newest Certified Wireless Network Expert (CWNE®). Venchierutti becomes only the 151st person worldwide to hold this prestigious title, recognized as one of the 10 most difficult designations to earn within the IT industry. The CWNE certification assures that the newly certified wireless professional has mastered all of the skills required of, and measured by CWNP, including design, installation, configuration as well as the ability to administer and troubleshoot wireless network systems. CWNE professionals are typically at the pinnacle of their respective fields, skilled at advanced design, protocol analysis, intrusion detection and prevention, performance and quality of service (QoS) analysis, and spectrum analysis and management.

Based in Treviso, in the Northeastern region of Italy, Venchierutti works as a Wi-Fi specialist at a Systems Integration company. He has his finger on the pulse of the latest technologies in the enterprise mobility world, advising companies and channeling his high-level of technical knowledge and expertise to assist in all stages of ideation and development — from pilot to rollout.

“CWNP is proud to name Nicolò Venchierutti as our newest CWNE,” said Brad Crump, General Manager of CWNP. “His experience in wireless networking is an asset to our growing list of top wireless professionals and it will go a long way toward advancing his own personal career in wireless,” adds Crump. “This certification will allow Mr. Venchierutti to deliver new value to clients as he continues to rise in the industry. It is just the beginning of many exciting things to come.”

To all aspiring CWNEs out there, Venchierutti suggests: “Begin with CWNA certification is an excellent baseline training for anyone working in wireless technologies seeking to improve his or her technical knowledge.” “Then, work toward earning one certification at-a-time, improving your technical skills at each stage. This builds confidence and will enable you to acquire the expertise you need to better service your customers,” advises Venchierutti.
