

CWNP® Announces IT Professional Wi-Fi Trek Conference September 24-26 in San Francisco

Wi-Fi Trends, New Technology on Tap from Wi-Fi Certification and Training Organization

DURHAM, N.C. & SAN FRANCISCO, CALIF. -- CWNP®, the IT industry standard for vendor neutral enterprise Wi-Fi certification and training, is pleased to announce it will be hosting the IT Professional Wi-Fi Trek Conference September 24-26 in San Francisco, California.

This premier technology event at the Parc 55 Hilton, Downtown San Francisco will provide networking opportunities, exhibits, and educational opportunities on subjects including mobile device management, Wi-Fi attack methods and vertical market issues in design.

“Wi-Fi Trek is the only conference that represents the complete Wi-Fi ecosystem, including attendees representing all the major Wi-Fi manufacturers, laptop vendors, Wi-Fi regulators such as IEEE, and even the FCC,” said Brad Crump, general manager.

According to Crump, CWNP will offer free certification testing during the conference in addition to providing networking opportunities and access to a Vendor Expo where attendees can talk to representatives from leading Wi-Fi companies as well as see live presentations on products and services.

Designed for CIOs, CTOs, network engineers, and Wi-Fi technicians, the Conference features a keynote address by Robert McDowell, former chairman of the FCC who will lead off the Wi-Fi Trek conference with an interactive presentation about the workings of Wi-Fi’s most influential governing body.

McDowell, who is often interviewed on breaking newscasts including CNN and CNBC, will cover topics ranging from spectrum allocation, specifically the future of 2.4 and 5GHz, to how you as an individual can influence the direction of the FCC. His talk will be in fireside chat format and he will be taking attendee questions live.

In all, the Wi-Fi Trek conference will have over 25 Wi-Fi speakers and 15 vendors on site to talk about new technologies and about what is going on within the industry. All attendees receive a goodie bag with an Aruba Access Point and an AccelTex antenna (along with other vendor goodies totaling over \$700 in value). Three day conference pass includes breakfast, snacks, lunch and evening receptions.

Founded in 1999, CWNP (Certified Wireless Network Professional) offers high-stakes, proctored certification exams and materials focused on 802.11 wireless networking technologies. CWNP offers six levels of career certification for Enterprise Wi-Fi:

Entry level - CWTS: Certified Wireless Technology Specialist

Administrator level - CWNA: Certified Wireless Network Administrator

Professional level - CWSP: Certified Wireless Security Professional

Professional level - CWDP: Certified Wireless Design Professional

Professional level - CWAP: Certified Wireless Analysis Professional

Expert level - CWNE: Certified Wireless Network Expert

Seasoned Wi-Fi professionals can easily make six-figure incomes as Network Managers, IT Managers, CIO, CTO and IT Executives.
