**CWNP® to Exhibit at FETC 2016 Conference in Orlando from January 12-15**

ORLANDO, FLORIDA – December 23, 2015 – Organized by the LRP Conferences LLC (an affiliate of LRP Publications), the Future of Education Technology Conference (FETC) is a must-attend event for education leaders, researchers and technology experts interested in the latest and emerging trends of K-12 education technology. The highlight of FETC’s work is its annual technology conference — an idea-sharing forum and exhibition for educators, technology coordinators, media specialists, curriculum designers, industry experts and technology companies looking for new ways to augment learning and student accomplishments.

This is the 36th year of this premier knowledge event, held at the Orange County Convention Center in Orlando. Each year, the conference brings together thousands of education professionals as well as numerous education technology experts from across the globe.

CWNP will have a presence at this year’s FETC, and be represented by Brad Crump, CWNP’s General Manager. “FETC is a platform for CWNP to foster business relationships with the enthusiastic educator,” said Crump. He adds: “We are looking forward to meeting with key stakeholders and taking the opportunity to spotlight how CWNP provides opportunities to those who manage Wi-Fi networks in education.”

The 2016 conference offers an exciting lineup of programs, technology solution seminars, game-based learning events, panel discussions, Science, Technology, Engineering, and Math (STEM) related programs, and several workshops designed exclusively for the education industry.

Beyond the numerous networking opportunities, Brad Crump says he is eager to attend talks such as: *The Emerging Technologies and Maker Tools*, *Online and Blended Learning* and *The Technology Infrastructure*, among others. “I’m excited to associate with the people who are making it happen in this space and hope to fully optimize CWNP’s presence at an event where education leaders from across the nation will gather,” says Crump.
